## Hofburg Congress Center

Heldenplatz  
A-1014 Vienna

The Hofburg is situated in Vienna's city centre. The most important museums are just down the street as are the Spanish Riding School, the Treasury, concert halls or the Vienna's most elegant shopping streets. Vienna International Airport – Schwechat is in 15 km distance to the city centre, within Vienna the Hofburg is easy accessible by public transportation.

## Technical Exhibition

A technical exhibition of pharmacological products, technical equipment and scientific literature will be held during the Congress. Potential exhibitors can request exhibition material from the Congress Office.

## Hotel Accommodation

The Congress Office offers many hotel rooms in different price categories. Please contact the Congress and Exhibition Office for further information.

## Vienna

The capital of Austria, is a destination steeped in history and intermingled with its historical buildings, fine arts and famous composers, like Mozart. You will find different styles of architecture from baroque to state of the art. Only a few cities can equal its range of culture, history and attractions. At every turn Vienna offers the visitors fascinating museums, exciting attractions and a whole host of things to do.

## Congress Information

Actual information about the Congress will be published at [www.adhd-congress.org](http://www.adhd-congress.org)

# 2nd International Congress on ADHD

From Childhood to Adult Disease

21 – 24 May 2009  
Hofburg Congress Center  
Vienna | Austria

[www.adhd-congress.org](http://www.adhd-congress.org)

## Welcome Address

Dear Colleagues,

We cordially invite you to the 2nd International Congress on ADHD – from childhood to adult disease. The 1st Congress in Würzburg was a big success and step forward gathering outstanding scientists on ADHD from all five continents as well as more than 1.600 participants from 68 countries. The second international Congress will take place in Vienna, Austria. It will further promote our understanding of ADHD as a transcultural neuro-psychiatric disorder of the lifespan.

The congress will focus on four main topics bridging the gaps between:

1. Our scientific and clinical knowledge on ADHD from its beginning in childhood, through its continuity in adolescence and persistence into adulthood; the developmental lifespan perspective will be again one of the most outstanding pillars of the scientific congress program.
2. Our knowledge about the most evident psychopathological behavioural symptoms, the features of associated brain structures, brain metabolism and brain function, associated biological and psychological endophenotypes of the human body in general and their interaction with genetic and environmental correlates considered from a developmental perspective.
3. A vast majority of research objectives, methods and disciplines: Child and Adolescent Psychiatry, Adult Psychiatry in cooperation with other clinical and basic research disciplines such as epidemiology, statistics, brain imaging, neurochemistry, physiology, psychology, psychotherapy, neuropsychopharmacology and developmental genetics.
4. Of a trans-cultural understanding of ADHD and its comorbidities.

Last but not least the congress will bridge the gaps between the participants coming from all continents. Let us meet each other and come to know each other personally and thus reinforce collaboration, friendship and trust in our scientific effort. The most qualified scientists and clinicians agreed to come and to contribute actively.

We therefore cordially invite you to join us in Vienna, this extraordinary historical city and the city of Sigmund Freud.

We welcome you all to the second International ADHD congress!

Professor Andreas Warnke, Würzburg, Germany  
Congress President

## Scientific Programme Committee

Chair: M. Gerlach, Germany

S.F. Ali, United States  
T. Banaschewski, Germany  
R. Barkely, United States  
J. Buitelaar, The Netherlands  
X. Castellanos, United States  
S.-C. Cho, Republic of Korea  
J. Deckert, Germany  
M. Döpfner, Germany  
H. Engeland van, The Netherlands  
J. Fegert, Germany  
A. Fossati, Italy  
R. Gainetdinov, United States  
W. Gattaz, Brazil  
L. Greenhill, United States  
J. Hebebrand, Germany  
M. Huss, Germany  
B. Herpertz-Dahlmann, Germany  
C. J. Kratochwil, United States  
G. Lehmkuhl, Germany  
K.-P. Lesch, Germany  
M. Muenke, United States  
H. Ozawa, Japan  
A. Philipsen, Germany  
H. Remschmidt, Germany  
P. Riederer, Germany  
L. Rohde, Brazil  
M. Rösler, Germany  
A. Rothenberger, Germany  
P.A. Rydelius, Sweden  
H.-C. Steinhausen, Switzerland  
R-D. Stiglitz, Switzerland  
J. Thome, United Kingdom  
E. Taylor, United Kingdom  
T. Wilens, United States  
Further members to be announced.

## Local Organizing Committee

Chair: S. Kasper, Vienna

T. Brücke, Vienna  
M. Friedrich, Vienna  
W.-D. Rausch, Vienna  
P. Riederer, Würzburg/Vienna  
B. Saletu, Vienna  
Further members to be announced.

## Topics

Addictive disorders  
Depression  
Co-morbidity  
Diagnosis  
Epidemiology  
Electrophysiology  
Etiopathogenesis  
Genetics  
Imaging  
Models, experimental  
Neurophysiology  
Obsessive Compulsive Disorder  
Pharmacology  
Pharmacogenetics  
Psychostimulants  
Substance Abuse  
Tics  
Tourette's Syndrome  
Treatment  
Other

## CME Accreditation

The 2nd International Congress on ADHD is seeking for accreditation by the European Council for Continuing Education (EACCME) to provide continuing medical education (CME) credits to physicians. The EACCME is an institution of the European Union of Medical Specialists (UEMS).
