6th World Congress on ADHD

From Child to Adult Disorder

20 – 23 April 2017

Vancouver | Canada

Dear Colleagues,

The World Federation of ADHD is now established as the international home for those interested in increasing the awareness and spreading the knowledge on ADHD. We are working on a range of different levels with several national and continental ADHD associations to promote the care and study of ADHD across the life cycle.

Our 5th World Congress on ADHD in Glasgow in May 2015 was remarkable, regarding the quality of the scientific programme as well as for the friendly atmosphere, stimulating mental health professionals from more than 60 countries to share their experiences and knowledge on ADHD. The congress embraced 1,600 delegates, which have actively contributed to this success.

The World Federation of ADHD is working hard to deliver updated scientifically and ethically sound information on ADHD worldwide. We are updating our website monthly, including more and more material on different aspects of the disorder, a service providing abstracts of everything that is published on ADHD. In addition, we are networking with related national associations in order to exchange scientific updates for our members and friends. In the end of the day, we are hoping that we can make the World Federation of ADHD your home for CME and for sharing evidence-based data on ADHD.

We are looking ahead to our next meeting – the 6th World Congress on ADHD – to be held in Vancouver, Canada, 20 – 23 April 2017. As usual, we are very happy to have a group of outstanding professionals composing our Scientific Programme Committee, including some of the best international researchers and clinicians devoted to ADHD. We intend to design an update, vivid and challenging programme dealing with the most relevant aspects of ADHD across the life cycle. Our Local Organizing Committee is already working to turn this congress into a wonderful mixture of science and pleasure experiences.

Vancouver, a modern city on the edge of a spectacular natural playground, has built a reputation as a premier destination for meetings and conventions. Look forward to experience a spectacular nature, a welcoming and hospital community characterized by the influences of 70 different cultures, an excellent cuisine and one of the leading cities in sustainability worldwide.

The state of the art convention centre is located in walking distance from the city centre and its hotels. Vancouver is easy to reach from most North American destinations as well as from all major overseas hubs by plane.

Please, consider joining us both by taking part in the upcoming 6th World Congress on ADHD in Vancouver in April 2017 and by becoming a member of the World Federation of ADHD.

Sincerely yours,

Luis Augusto Rohde
President of the World Federation of ADHD

Manfred Gerlach
