# A CONGRESS BOOKMARK

Dear colleagues,

In the light of the continuing COVID-19 pandemic the board of the WF ADHD decided that the 8<sup>th</sup> World Congress of ADHD 2021 will be a hybrid event. Presenters and attendees can either come to Prague or participate via a virtual platform.

The congress dates will stay as originally planned from 6 – 9 May 2021. It's up to you – join us onsite in Prague or online! Either way, you will learn from world class researchers and clinicians. Live interactions with our speakers and discussants will be possible from home, too.

All scientific sessions will stay available after the event dates on the congress platform as video on demand to ensure all registered attendees continued access to all the latest updates in the field of ADHD.

Our hybrid congress will be completed with a virtual exhibition that enables you to get in contact with our industry partners and exhibitors, just as you have been used to at the face-to-face events. The Scientific and Organizing Committee is preparing a wide range of topics to appeal to clinicians and researchers. Very shortly the first confirmed sessions will be announced, in order to convince you to attend the ADHD 2021 – in person or online from home.

We look forward to welcoming you to the first hybrid World Congress of ADHD!

*On behalf on the ADHD Executive Committee*

## CITY OF PRAGUE

The city of 100 spires, “Golden Prague” is a jewel in the heart of Europe. Culture, tradition and a lively atmosphere present themselves in beautifully restored cultural monuments and former aristocratic palaces. Although the narrow lanes of the Old Town and Lesser Town invite visitors to romantic walks, Prague also has its modern facets. Prague is worth a visit.
